Work experience (8+ Years)

Assistant Consultant

May 2016 - Present

Tata Consultancy Services

Developing and user interface part of web applications using Angular, React, JavaScript, Typescript, JQuery, HTML5, CSS3 etc

Software Engineer

February 2013 - April 2016

Fingent Technology Solutions

Started professional career as full stack developer, working on web applications using PHP, MySQL, Javascript, JQuery etc.

Important Project Contributions

Life Science Domain

2018 - 2021

Tata Consultancy Services

Working as a UI lead for a multinational pharmaceutical and life sciences company which is one of the largest pharmaceutical companies in the world. Have been working in various projects using Angular 2+, React JS, JavaScript, Typescript, jQuery, HTML 5, CSS 3 etc.

Travel, Transport and Hospitality Domain

2017 - 2018

Tata Consultancy Services

Played a crucial role in developing a live, real time vessel monitoring dashboard for one of the leading ship manufacturing companies in the world. The dashboard was one of the key attraction of the application and it consisted of a lot of gauge like widgets. Because of the perfectionist nature of the customer, we were unable to make use of any external libraries. So we developed several gauges (Speedometer, Compass, Thermometer, Cross needle etc) using SVGs. That was one of the most satisfying works I have done.

Utilities Domain

2016 - 2017

Tata Consultancy Services

Core member of the Front end development team for a project which is known to be the first of it's kind application. Developed the most important features in the application like 'Rate card' and 'What if Analysis'.

Reachout

2014 - 2015

Fingent Technology Solutions

Have performed the role of a full stack developer for a product launched by the working organization. That was a surveying application with lot of attractive features like question logic, configurable survey with different types of questions, question ordering, graphical response analysis etc. Have contributed right through the project in all areas of the web application.

Learning Management System

2015 - 2016

Fingent Technology Solutions

Core member in the development team of two learning management applications. Designed the relational database and table structure for one of them and performed the role of a full stack developer, with PHP and MySQL serving as the server language and database respectively. Both the applications have features like online courses, online assessments etc.

Skills

Javascript and Typescript

Strong knowledge of the OOP concept, ES6, Typescript etc

Exposure to package managers like npm, yarn etc

Angular

Experience in both Angular 1 and Angular 2+. Hands on on writing unit test cases using Jasmine and Karma.

Created a customized UI architecture for a project, which received customer appreciation for the code quality and scalability of the project.

React JS

Worked in a project for a short period of time. Did not use any state management library

HTML

Strong knowledge on HTML 5 and it's features.

Over 3 years of experience in working in HTML5
